Perfect Protection for Precious Diamonds

Diamonds are rare and special and the same fact makes them very lucrative for malpractices such as diamond STEALING, MIXING and DUPLICATING.

When a diamond processor transforms a raw diamond into an expensive, polished diamond, it becomes imperative to protect it at any cost.

Presenting, The Smart-i15, a highly advanced, sophisticated solution from STPL provide smart defense against any malpractice, by flawlessly registering, identifying and protecting each diamond.

Salient Features

Totally Non-Invasive Process
Complete & Flawless Beauty

Plug & Play: **Powerful yet Amazingly Compact and Convenient**

Fast & Accurate:
Perfect for Superior Protection

Use & Share: **Data Sharing Beyond Boundaries**

Add 5th "C" of Confidence

How SMARTLY It Works?

Diamond REGISTRATION

Simply, REGISTER a polish diamond by entering or exporting (from your server) the stone details like stone ID, diameter, weight, etc in Smart – i15. The successful registration generates a unique ID for the registered polished diamond. Now, RELAX and one can send registered polish diamond anywhere across the globe for selling or for exhibition or for any relevant use...

Diamond VERIFICATION

Now, on the arrival of the polish diamond from its trading journey, to VERIFY it just place it in the Smart-i15. The smart system will VERIFY the registration ID and decide whether the polished diamond is the same as the one registered or not.

Diamond IDENTIFICATION

IDENTIFICATION FUNCTION is designed to identify the returned polished diamond from the database of all registered diamonds. The unique thing about this process is it can be done without needing "Registration ID".

Specifications

Dimensions

**180mm x 180mm x 300mm (W x D x H)
(Excluding Computer)**

• Having Customer Base in More Than •
30 Countries & 5 Continents
